Positive Aging Health and Wellness Series

Multicultural
Health Institute

Topics:

- Relationship Issues
Across the Ages

February 12, 2015

Welcome

The Multicultural Health Institute is proud to present the Positive Aging Wellness Series Program. All sessions will feature both an oral technology component and a wellness segment that will touch on topical issues of aging.

The oral technology portion is an open session with high school students who will assist attendees with utilizing, learning, and familiarizing themselves with various technologies to access wellness resources. The wellness program segment will educate attendees on vital health topics through discussions with professionals in related health care fields.

The Multicultural Health Institute (MHI) seeks to level the healthcare playing field by promoting, educating, and insuring equal healthcare access and treatment for individuals and communities who are traditionally uninsured and receive a poor quality of care.

Multicultural Health Institute

Speaker:

Gary E. Ervin, MPA – Disease Intervention
Services, Florida Department of Health in
Sarasota County

United Sarasota - A survey will be provided to obtain your feedback, perspective and aspirations on ways to improve our citizens' quality of life and well-being.

The objective of this initiative is to take aspirations from community and turn them into actions that will result in positive change. This initiative has the potential to change the way our community approaches issues and the way it develops innovative, collaborative partnerships that may not have been otherwise realized.
